

## Service

### Installation

Full turnkey installations or supervisory support of customers engineering personnel.  
All projects complete with dedicated Project manager.

### Training

System training is included with all projects. Additional days also available on request in case of personnel/operator changes.  
APCS/iMPRESS Software training also includes classroom sessions for all operators.

### Support

Bespoke support contracts available, including PLC software, general mechanical and electrical maintenance. Support ranges from telephone technical assistance to 24 hour priority call out.

### After Sales & Replacement Parts Supply

- . Post project customer store parts packages.
- . Site inspection and parts/maintenance reporting and recommendation.
- . Comprehensive part stock for immediate supply.
- . All major vendors and OEM.

## Avanti always moving forward...

30 years of materials handling experience & hundreds of installations all over the world. Expertise covers from full plant systems to basic processes.

With a reputation for technical excellence, Avanti are a market leader and specialise in the Corrugated & Paperboard materials handling industry.

Having built up a comprehensive customer base throughout the UK, Europe, Middle East and South Africa, with high percentage of recommendations and repeat custom.

# Equipment, Services & Solutions for the Corrugated & Paperboard Industries

Corrugated | Speciality Products  
& Sheet Feeders

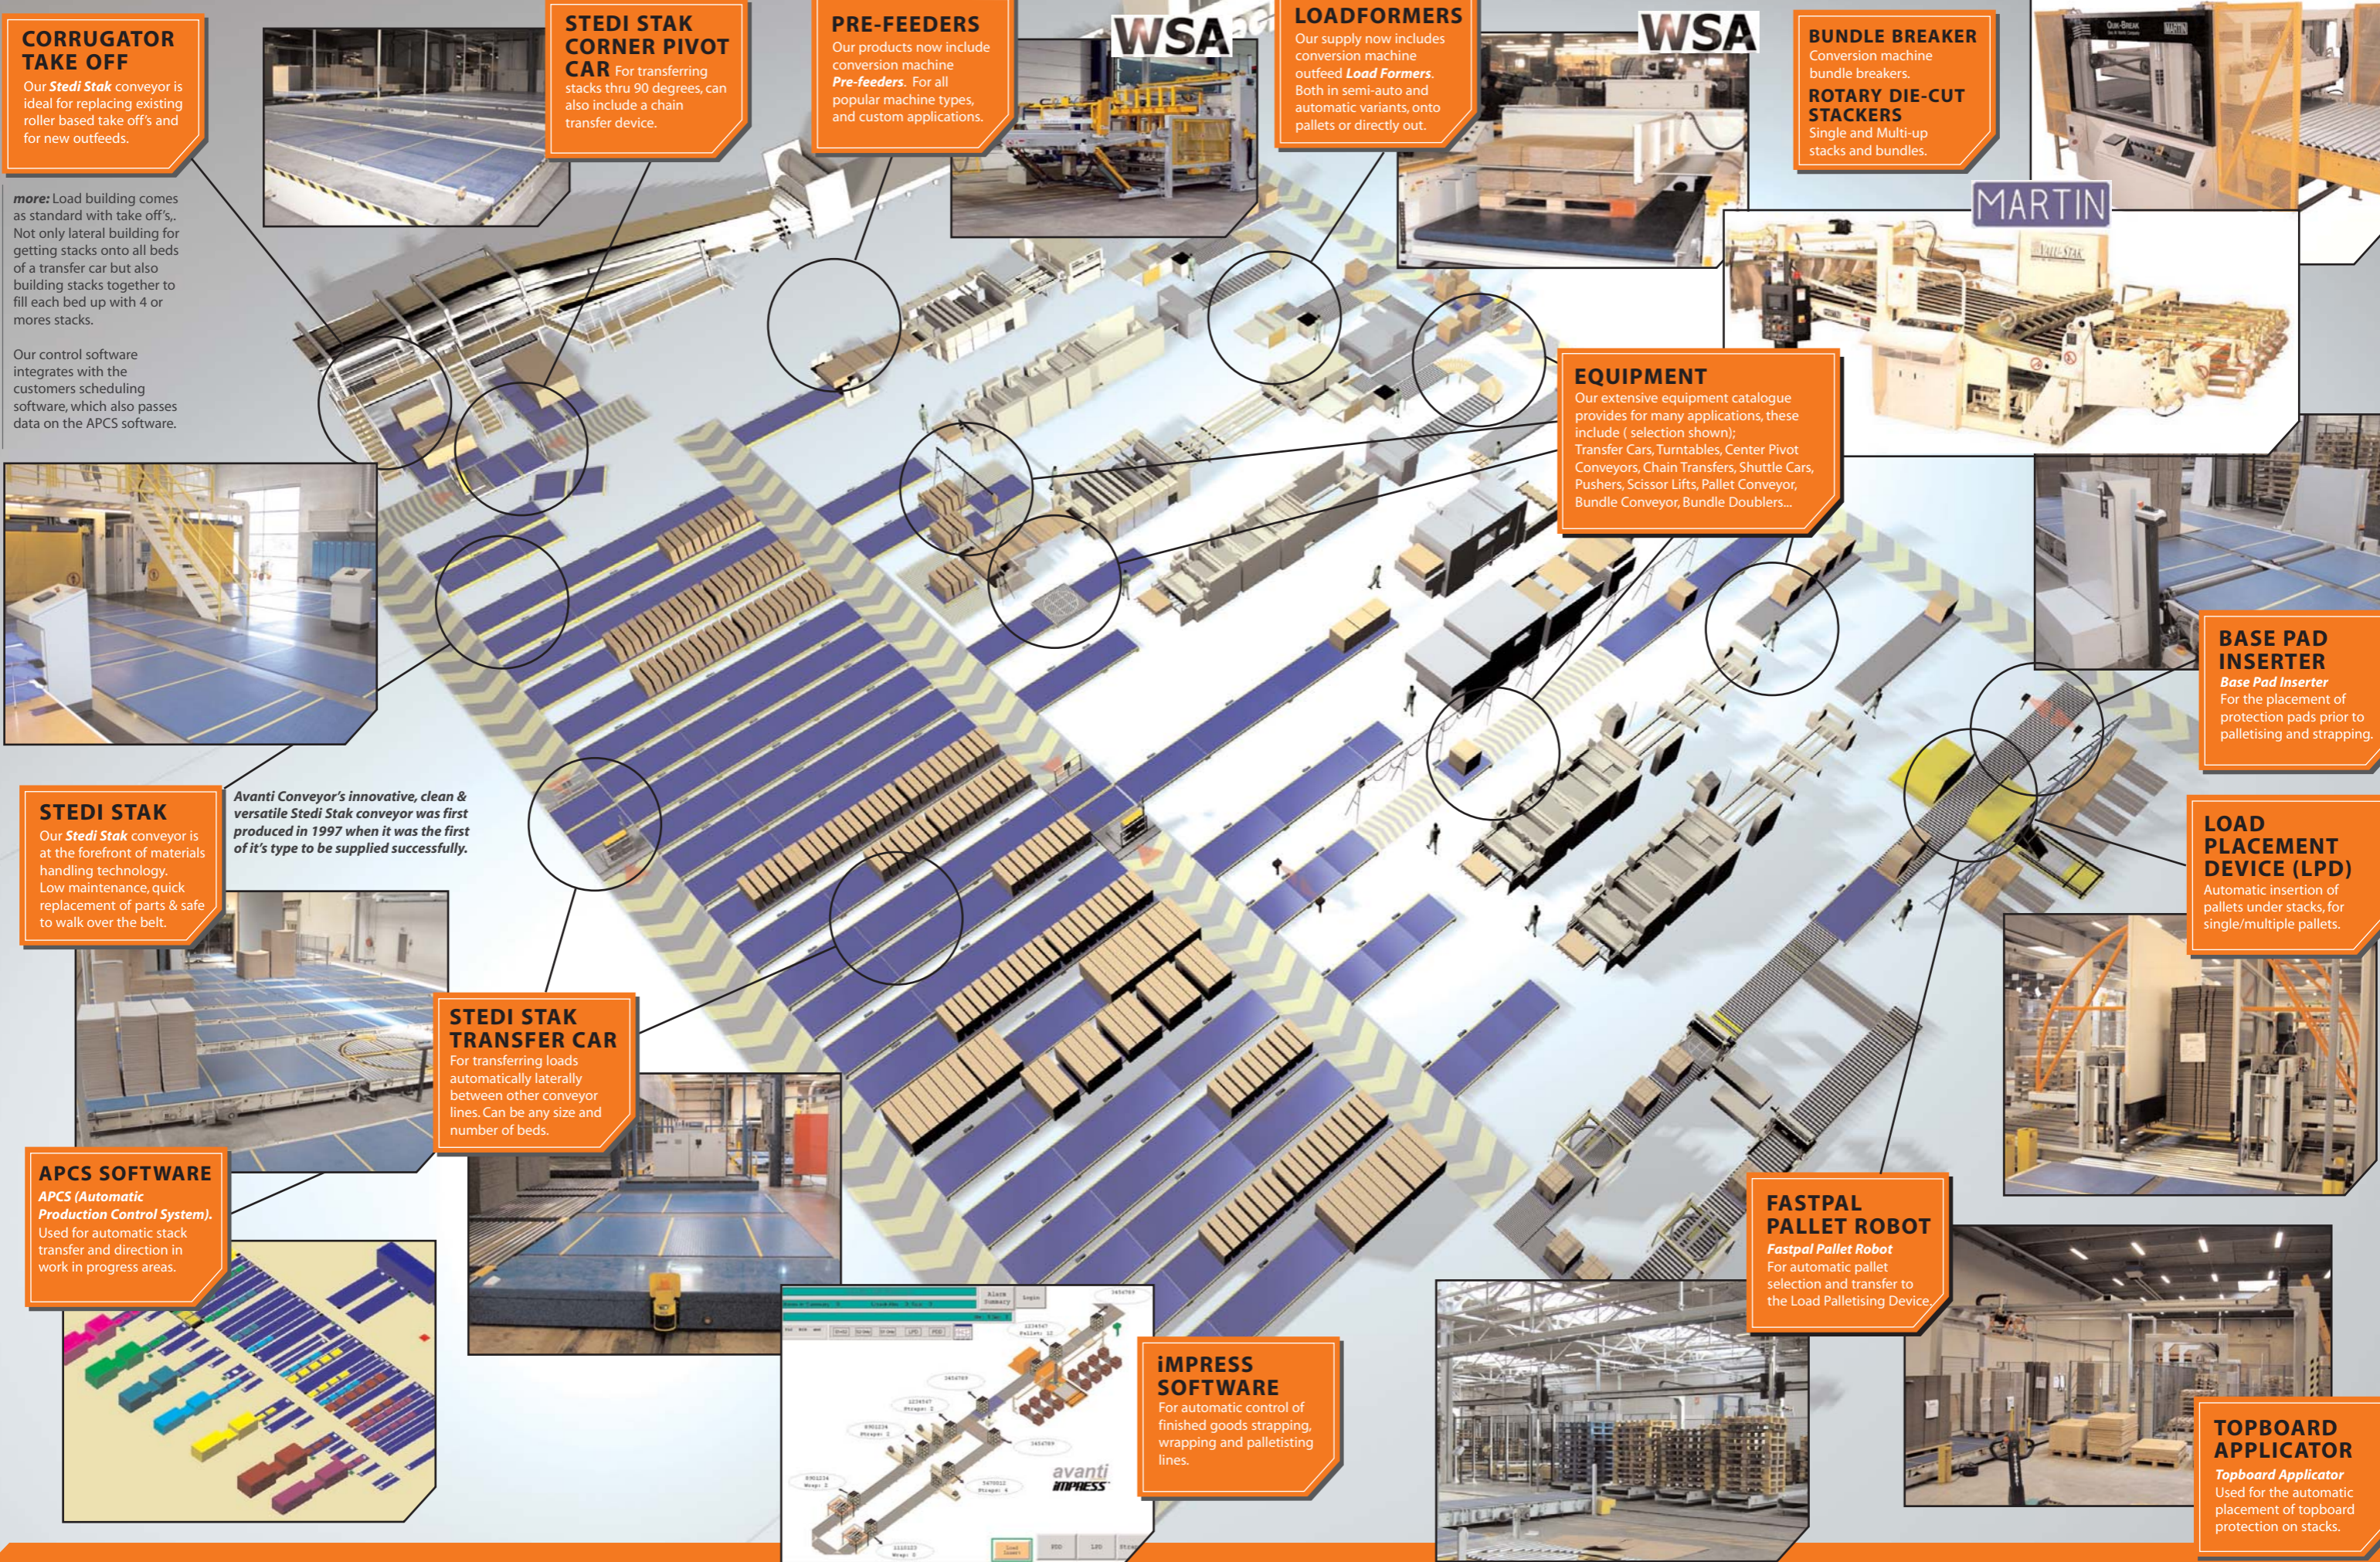

Production performance modelling and statistical analysis . Full scope conveyor systems  
Automatic work in progress . High speed pallet robot . Fully automatic centralised Load  
Palletising . Top dressing application . Stack base protection . Prefeeder . Load formers/Bundle  
Palletising . Control systems . Re-control . Servicing . Support . Custom equipment & solutions

conveyors

**CORRUGATOR TAKE OFF**  
 Our *Stedi Stak* conveyor is ideal for replacing existing roller based take off's and for new outfeeds.

*more:* Load building comes as standard with take off's. Not only lateral building for getting stacks onto all beds of a transfer car but also building stacks together to fill each bed up with 4 or mores stacks.

Our control software integrates with the customers scheduling software, which also passes data on the APCS software.

**STEDI STAK CORNER PIVOT CAR**  
 For transferring stacks thru 90 degrees, can also include a chain transfer device.

**PRE-FEEDERS**  
 Our products now include conversion machine *Pre-feeders*. For all popular machine types, and custom applications.

**LOADFORMERS**  
 Our supply now includes conversion machine outfeed *Load Formers*. Both in semi-auto and automatic variants, onto pallets or directly out.

**BUNDLE BREAKER**  
 Conversion machine bundle breakers.  
**ROTARY DIE-CUT STACKERS**  
 Single and Multi-up stacks and bundles.

**EQUIPMENT**  
 Our extensive equipment catalogue provides for many applications, these include ( selection shown); Transfer Cars, Turntables, Center Pivot Conveyors, Chain Transfers, Shuttle Cars, Pushers, Scissor Lifts, Pallet Conveyor, Bundle Conveyor, Bundle Doublers...

**BASE PAD INSERTER**  
*Base Pad Inserter*  
 For the placement of protection pads prior to palletising and strapping.

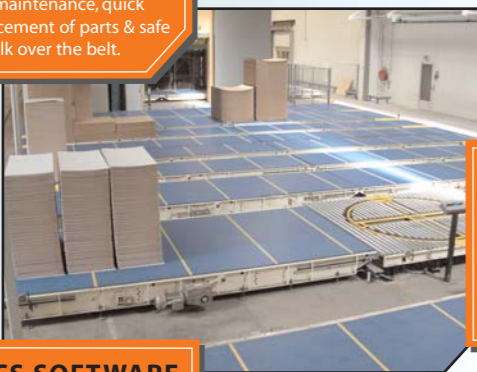

**LOAD PLACEMENT DEVICE (LPD)**  
 Automatic insertion of pallets under stacks, for single/multiple pallets.

**STEDI STAK**  
 Our *Stedi Stak* conveyor is at the forefront of materials handling technology. Low maintenance, quick replacement of parts & safe to walk over the belt.

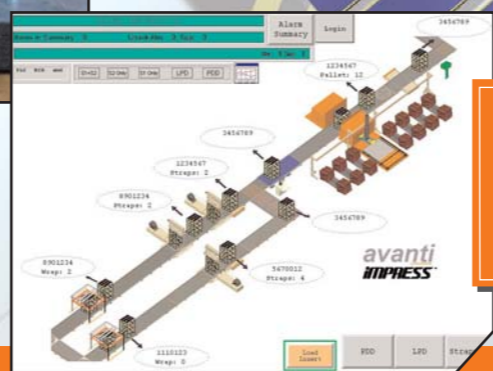

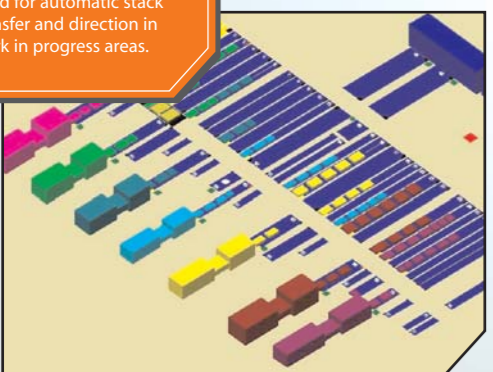

*Avanti Conveyor's innovative, clean & versatile Stedi Stak conveyor was first produced in 1997 when it was the first of it's type to be supplied successfully.*

**STEDI STAK TRANSFER CAR**  
 For transferring loads automatically laterally between other conveyor lines. Can be any size and number of beds.

**APCS SOFTWARE**  
*APCS (Automatic Production Control System)*. Used for automatic stack transfer and direction in work in progress areas.

**IMPRESS SOFTWARE**  
 For automatic control of finished goods strapping, wrapping and palletising lines.

**FASTPAL PALLET ROBOT**  
*Fastpal Pallet Robot*  
 For automatic pallet selection and transfer to the Load Palletising Device.

**TOPBOARD APPLICATOR**  
*Topboard Applicator*  
 Used for the automatic placement of topboard protection on stacks.
