

Going Bananas Campaign – Campaign Feedback

St Regis Paper Co Ltd, Kemsley Paper Mill

Mill Update:

Having recently completed the 'climate survey' on our site, housekeeping was identified as an issue.

We set up teams to focus on issues arising from the survey – housekeeping being one such issue.

We have developed a risk assessment system for slip trip fall hazards, which we are currently training our employees to use during their training days.

In two weeks time they will be undertaking practical sessions where they will be actually undertaking slip trip fall risk assessment.

We ran the training sessions to coincide with European Safety Week. The GPMU chapel is supporting and participating in this process – the senior safety representative is part of the presentation team.

We have collected many photographs from around the site, which we use for syndicate work and hazard identification examples.

The assessment outcomes will be collated into a site project plan to address the deficiencies identified.
